FOREWORD

The district census hand book (DCH), compiled by the Census Organisation on behalf of the State Governments, is one of the most valuable products of the Census. The DCH is constantly referred to by planners, administrators, academicians and researchers. It is *inter alia* used for delimitation of constituencies, formulation of local level and regional plans and as an aid to District administration. The district census hand-book is the only publication which provides Primary Census Abstract (PCA) data upto village level for the rural areas and wardwise for each city or town. It also provides data on infrastructure and amenities in villages and towns, etc.

The district census handbook series was initiated during the 1951 Census. It contained important census tables and PCA for each village and town of the district. During 1961 Census the scope of the DCH was enlarged and it contained a descriptive account of the district, administrative statistics, census tables and a village and town directory, including PCA. The 1971 DCH series was planned in three parts. Part—A related to village and town directory, Part—B to village and town PCA and Part—C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. However, in some states it was confined to district census tables and in a few cases altogether given up due to delay in compilation and printing.

While designing the format of 1981 DCH series some new features along with the restructuring of the formats of village and town directory have been attempted. At the same time, comparability with the 1971 data has also been kept in view. All the amenities except power supply in the village have been brought together in the village directory with the instruction that in case an amenity is not available in the referent village the distance in broad ranges from the nearest place where the amenity is available may be given. The restructuring of the format of the village directory and incorporating more exhaustive data on infrastructure aspect particularly in relation to amenities and land-use pattern is expected to further meet the need of micro level planning for rural areas. It is expected to help not only in local area planning but regulating the provision of goods and services as well so as to minimise the regional imbalances in the process of development. A few new items of information have also been introduced to meet some of the requirements of the Revised Minimum Needs Programme. Such new items of information as adult literacy centres, primary health sub-centres, and community health workers in the village have been introduced in the village directory with this objective in mind. The new item on approach to the village is to have an idea about the villages in the district which are inaccessible. A new column, "total population and number of households" has been introduced to examine the correlation of the amenities with the population and number of households they serve. Addition of two more appendices listing the villages where no amenities are available and according to the proportion of scheduled caste and scheduled tribe population to the total population has also been made with this view in mind.

The formats of the town directory have also been modified to meet the requirements of the Minimum Needs Programme by providing information on a few new items. A new statement on civic and other amenities in slums in Class -I and Class -II towns (Statement IV—A) has been introduced with this objective in mind. It is expected that this will help the planners to chalk out programmes on provision of civic amenities for the improvement of slums. The columns on Scheduled Castes and Scheduled Tribes population in statement IV relating to civic and other amenities and adult literacy classes/centres under educational facilities in statement V are also added *inter alia* with this view. A significant addition is class of town in all the seven statements of the town directory. The infrastructure of amenities in urban areas of the country can be best analysed by taking the class of town into consideration. The addition of the columns on civic administration status and population in a few statements also serves this purpose.

The format of the primary census abstract for the villages and towns has been formulated in the light of changes in the economic and other questions canvassed through the individual slip of 1981 Census.

In order to avoid delay in publication of 1981 DCH series it has been so designed that Part—A of the volume contains village and town directory and Part—B, the PCA of villages and towns including the Scheduled Castes and Scheduled Tribes PCA upto Police Station/Town levels. At the beginning of the DCH a detailed analytical note supported by a number of inset tables based on PCA and non census data in relation to the infrastructure has been introduced to enhance its value. The District and Police Station level maps depicting the boundaries and other important features have been inserted at appropriate places, to further enhance the value of the publication.

This publication is a joint venture of the State Government and the Census Organisation. The data have been collected and compiled in the state under the direction of Shri S. N. Ghosh, I.A.S. the Director of Census operations, West Bengal on behalf of the State Government which has borne the cost of printing. The task of planning, designing, and co-ordination of this publication was carried out by Shri N. G. Nag, Deputy Registrar General (Social Studies) of my office. Dr. B. K. Roy, Deputy Registrar General (Map) provided the technical guidance in the preparation of the maps. Data received from Census Directorates have been scrutinised in the Social studies Division at the headquarters under the guidance of Shri M. M. Dua, Senior Research officer. I am thankful to all who have contributed in this project.

New Delhi

the 26th April, 1982

P. PADMANABHA

Registrar General, India

PREFACE

The District Census Handbook compiled by the Census Directorate, West Bengal, on behalf of the Govt. of West Bengal, containing Census Statistics besides other invaluable data of importance for use by the State Govt., district administration, research scholars and various other data-users owes its origin to 1951 Census. The present publication of 1981 Census is fourth in the series.

The Census of 1981 was conducted in February, 1981 with sunrise of 1st March, 1981 as reference date under the stewardship of Shir S. N. Ghosh, Director of Census Operations, West Bengal. The credit for the success of the operation goes entirely to Shri Ghosh. However, before the report could be finalised, Shri Ghosh had to resume his duties under the Govt. of West Bengal in public interest. The present publication is the product of his dedicated labour, immaculate planning and sterling administrative capabilities. Without the active involvement and inspiring leadership of Shri Ghosh, the present publication would have been a still birth.

The Census Statistics in the form of Village and Town Directory included in the publication relate to the district of Twenty Four Parganas. A brief analytical note with a number of inset tables based on Census data, included in this publication, will hopefully meet the requirements of the readers. As mentioned earlier, the 1981 Census operation in West Bengal was conducted by Shri S. N. Ghosh, as Director of Census Operations under the inspiring captaincy of Shri P. Padmanabha, former Registrar General and ex-officio Census Commissioner of India whose imaginative planning, enthusiastic support and electrifying guidance led us to successful completion of an undoubtedly difficult operation. We silently recall the contribution of Shri Padmanabha.

Shri V. S. Verma, the present Registrar General, India has been guiding us soon after his assumption of office in 1983 to oversee the timely completion of the project. Without his active support, deep understanding and mature guidance, the publication would not have progressed much. We are grateful to Shri Verma.

We gratefully recall the help, guidance and advice received from Shri V. P. Pandey, Joint Registrar General, India in technical and administrative matters relating to this project.

Dr. N. G. Nag, Deputy Registrar General (Social Studies) and his colleagues has provided us technical guidance and scholarly assistances right from the start of the project. We acknowledge our debt to him and his colleagues.

We are also indebted to Shri K. K. Chakraborty former Deputy Registrar General (C & T) and Shri N. Rama Rao, Asstt Registrar General, for their helpful suggestions. Dr. B. K. Roy, Deputy Registrar General (Map) had provided us excellent support and guidance in cartographic matters. We are indebted to him.

The data presented in the volume were collected at grass-root level by the District Magistrate, Twenty Four Parganas (Principal Census Officer) and his innumerable colleagues including the Charge Superintendents. We acknowledge their contributions to the preparations of this volume.

The final tabulation and compilation of data have been done by the Central Tabulation Unit of this office under the supervision of Sri S. K. Guha, Investigator, first under the guidance and supervision of Shri M. N. Sarkar, Asstt. Director of Census Operation, (since retired) and later under Shri A. K. Dutta, Deputy Director of Census Operations, West Bengal. Without their sincere efforts the data could not have been finalised. The analytical note was prepared by Shri S. K. Guha, Investigator and scrutinised, edited and finalised by Shri A. K. Dutta, Deputy Director of Census Operations, West Bengal. The publication is a silent testimony to their labour and love.

The printing work was supervised very efficiently by Shri S. K. Guha, Investigator, under the able guidance of Shri A. K. Dutta, Deputy Director without whose direct involvement the publication could not have seen the light of the day. We recall Shri Datta's effective contribution with admiration.

There were also officials who had contributed to the project from behind the curtain. Among officials of the State Government who had helped us in various stages of the publication are Shri K. J. Basu Roy Chaudhury, WBCS and Shri B. Bhattacharyya, WBCS, both Deputy Secretaries to the Govt. of West Bengal Home (C & E) Department, Writers' Buildings, Calcutta and their colleagues to whom we pay our tribute. Mention should also be made of the Controller of Stationery, Govt. of West Bengal, for kindly providing us the necessary printing materials.

Lastly, we must express our appreciation Printed By Print & Crafts, 24/1A, Budhu Ostagar Lane, Calcutta-700 009 for the printing of this Publication.

Calcutta

Sukumar Sinha

Joint Director of Census Operations,
West Bengal

ANALYTICAL NOTE

ANALYTICAL NOTE

It has been the tradition of the Indian Census to present the census data under the two broad divisions termed urban and rural.

The definition of an urban unit at the 1981 Census is as follows :

- (a) All places with a Corporation, Municipality, Town Committee, Notified Area, Cantonment.
- (b) All other places which satisfied the following criteria :
 - (i) A population of 5,000 as the minimum,
 - (ii) Density per square kilometre would be a minimum of 400, and
 - (iii) At least 75% of the male working force should be engaged in non-agricultural pursuits.

Apart from town/city the 1971 concept of urban agglomeration is also adopted for the 1981 Census. An urban agglomeration means a stretch of urban area covering more than one municipality/town/urban outgrowth within a geographically contiguous urban continuum. An urban agglomeration shows how a particular area has had geographically continuous urbanisation.

Mention may be made in this connection of urban outgrowths. The concept of urban outgrowth has come into force for the first time in 1981 Census. The outgrowth, which must necessarily be contiguous to an urban area, is itself an urban area in so far as it fulfills the last two criteria of being an urban unit, but it falls short on the population front, *i. e.* it would have a population of less than 5,000 but more than 600.

All other areas which are not covered by the definition of urban as stated above will be treated as Rural.

Census House :

We defined the Census house in the following manner : "A census house is a building or part of a building having a separate main entrance from the road or common courtyard or staircase etc. used or recognised as a separate unit. It may be occupied or vacant. It may be used for a residential or non-residential purpose or both". Actually to make the concept understandable and applicable in field we had to introduce the concept of singleness of use. What, as per the above definition, would be a census house otherwise might not be so if there is no singleness of use.

Household :

We defined household as follows : "The household is a group of persons who commonly live together and would take their meals from a common kitchen unless the exigencies of work prevented any of them from doing so. There may be a household of persons related by blood or household of unrelated persons or having a mix of both".

Scheduled Castes/Scheduled Tribes :

We have our own list of scheduled castes and scheduled tribes notified for our state only. If the person belonging to a scheduled caste or scheduled tribe returns his caste or tribe by a synonym or generic name of

a caste or a tribe, the information was noted if it found place in the notified list. All efforts were given to ascertain the correct name of the scheduled caste or tribe as found in the notified list. For a household belonging to scheduled castes or scheduled tribes, religion of the head of household was also examined. Scheduled caste population are found only among the Population belonging to Hindu and Sikh religions but the scheduled tribe population may belong to any religion.

Literates :

In the census terminology, a person who can both read and write with understanding in any language is to be taken as literate. A man who can merely read but cannot write is not a literate. It is not necessary that a person who is literate should have received any formal education or should have passed any minimum education standard. All the children of the age of four years or less were treated as illiterate even if the child was attending a school or might have picked up reading and writing.

Careful attention was also given while collecting information on educational attainment of individuals. The highest education level attained by the person enumerated was recorded. This information is vital for manpower planning.

Main Workers :

The definition of worker difference between 1971 and 1981 and the system of dividing the entire population by application of the concept of worker has also undergone a very important change. Earlier in 1961 and then in 1971 the total population was divided into two categories mutually exclusive of each other. They were workers and non-workers respectively. But in 1981, this dichotomy has been replaced by a trichotomy with three categories mutually exclusive of each other, viz. main workers, marginal worker and non-workers.

The 1961 Census definition of worker was as follows:

"The basis of work will be satisfied in the case of seasonal work like cultivation, livestock, dairying, household industry etc., if the person has had some regular work of more than one hour a day throughout the greater part of the working season. In the case of regular employment in any trade, profession, service, business or commerce the basis of work will be satisfied if the person was employed during any of the fifteen days preceding the day on which you (Enumerator) visited the "Household". In 1971, the following definition was applied : "A worker is a person whose main activity is participation in any economically productive work by his physical or mental activity. Work involves not only actual work but effective supervision and direction of work. The reference period is one week prior to the date of enumeration in the case of regular work in trade, profession, service or business. If a person had any such regular work on any one of the days during this reference period and this has been returned as his main activity the person will be categorised accordingly..... There are certain types of work which are not carried on throughout the year such as cultivation, livestock keeping, plantation work, some types of household industry etc. A person's main activity should be ascertained with reference to such work in last one year even if he was not economically active in the week prior to enumeration".

Further, those who did not do any work in the manner described above, yet did some work to come under the category of secondary worker. As per 1971 definition, it was to cover "cases like persons performing household duties or students who may not be engaged in any other economically productive work at all, as also those who, though basically are performing household duties or students etc., for the purpose of their main activity, still participated in some other economic activity such as helping the household in several items of work, as in cultivation, or in household industry, or in looking after the cattle, in attending to family business etc., but not to the extent as a full time work. Such participation will be considered as secondary work of those persons..... participation of work that goes to augment the income of the household will only be treated as economic activity".

In 1981 Census any one who has done any work at all during the last one year is a worker. The definition of work as participation in any economically productive activity either in physical or mental way remain more or less the same as in 1971. But this time the population has been classified into three main groups, each mutually exclusive of the others. The main workers are those who have worked major part of the year preceding the enumeration. In other words, the main worker is somebody who has done economically productive work for at least 183 days during the year preceding enumeration. All workers have been categorised in four distinct parts viz. (i) Cultivators, (ii) Agricultural Labourers, (iii) Household Industries and (iv) Other Workers in 1981 Census. This is a major departure from the 1971 categories of workers. In 1971 Census the workers were divided in nine categories.

Marginal Workers :

The marginal workers are those who have worked any time at all in the year preceding enumeration but have not worked for a major part of the year. In other words, marginal workers are those who participated in economically productive work for less than 183 days during the year preceding Enumeration.

Non-Workers :

.Non-workers are those who have not done any economically productive work at all during the last one year. All non-workers have been divided into seven categories in 1981 Census. They are (i) Students, (ii) Household duties, (iii) Rentiers/Retired persons, (iv) Beggars etc., (v) Inmates of Institutions, (vi) Dependents and (vii) Others.

District Census Handbook :

The District Census Handbook was started printing from 1951 census. The Government and the Development agencies felt necessity of the data at micro-level for the social and economic development all over the country during the post independence era. Until then, the compilation of data was limited to district, police station and town levels only. In 1951, it was extended to the mouza level.

The publication programme of district census handbook of 1951 continued undisturbed in 1961 also and it was enlarged with the introduction of official statistics.

The major changes in the District Census Handbook publication were introduced in 1971. The District Census Handbook 1971 was divided into three parts viz. Part XA, Part XB and Part XC. The first part dealt with village and town directories. In Village Directory the villagewise data on amenities available was given and information in respect of each town was given in the Town Directory. The Part XB consists of Village and Town wise (Ward wise for municipalities, town committees, and all statutory towns) Primary Census Abstract of the concerned district.

The third part i. e. Part XC dealt with the non-census data and social, economic and cultural tables. All the three parts were printed either in two volumes i. e. Part XA & XB and part XC or in three volumes part XA, part XB and part XC separately according to size of the districts.

The scope of District Census Handbook 1981 has been enlarged considerably specially in relation to the amenities available in the villages and towns and landuse pattern in villages and non-municipal towns. The collection of data on recognised slums of Class I and Class II towns of the state is a new addition of 1981 in the Town Directory portion of the District Census Handbook. The format of the primary census abstract have been restructured due to the change of economic questions. The data on marginal workers collected through the canvassing of individual slips is an important addition. Workers have been categorised in four sectors instead of nine in 1971.

Scope of Village Directory :

A twenty column format was canvassed during 1981 census period for collection of data from each and every mouza within each police station. This is called village directory. The mouzas within a police station have been represented in order of their location codes. This twenty column format has been divided in four parts. The column nos. 1-4 represent general information, column nos. 5-14 represent amenities available, column nos. 15 to 19 are meant for landuse pattern and the column 20 contains special information in respect of historical, archaeological and religious interest about the mouza. At the end of each police station, the totalling has been done for column nos. 3 to 6 and 15 to 19. If any amenity is not available in the village a dash (—) has been marked in the relevant column and next to it the distance of the nearest place where the facility is available has been given in the broad ranges.

The following systems were followed for indicating educational institutions, if any, located within the villages. The abbreviations used for the educational institutions are also given below :—

1. Primary or Elementary School (P)

All nursery, kindergarten, pre-basic, pre-primary, Junior Basic School upto Class V and Primary School upto Class IV have been included in this group.

2. Junior Secondary or Middle School (M)

All schools from Class V to Class VIII including Junior Madrasa upto Class VIII have been noted in this group.

3. Secondary School (H)

All schools upto Class X including the schools providing Senior Cambridge Course and High Madrasa upto Class X have been treated as high school.

4. Higher Secondary School (PUC)

All educational institutions where the education is imparted for Class XI and XII have been marked for this group.

While collecting the data according to the pattern as stated above certain limitations were imposed. We have considered only those institutions which are recognised by any competent authority and the specific classes of a school upto which recognition has been given. In case of composite schools like secondary schools with middle classes and primary classes or middle schools with primary classes, the relevant groups of classes have been treated separately, e. g., a composite school having classes upto XII (Twelve) has been divided as follows :—

Classes from	I	to	IV	...	(P)
"	V	to	VIII	...	(M)
"	IX	to	X	...	(H)
"	XI	to	XII	...	(PUC)

It is to be noted that by dint of the above kind of division, we are not going by how many educational institutions physically exist within a village, but by occupying of classes each group being treated as a school of its kind. It is also to be noted that the said groupings will hold true irrespective of the educational institution they belong to. For example, the grouping marked as PUC i. e. Class XI and Class XII may physically belong to a college, but for the purpose of the Village Directory, these two classes taken together has constituted one unit of PUC., the rest of the classes has been treated as a college.

5. College (C)

Any college with the disciplines of Arts, Science and Commerce have been grouped here.

6. Industrial School (I)

7. Training School (Tr)

8. Adult literacy Class/Centre (AC)

9. Other Educational Institutions (O)

(Sanskrit tole, senior basic school, Makhtab etc. have been noted as others).

It is needless to mention once again that in sl. no. 5 to 9 the institutions having recognition from any competent authority have been taken into account.

In case of more than one institution of a type in the village, the number of institutions have been indicated

in brackets. If any of the educational institutions as stated above is located in a village, the existence of other types of educational institutions located in nearest village (S) have not been collected. Suppose, a primary school is functioning in the village, but there is no middle or high school in the village und reference; in this case we have not indicated the distance of the nearest place where a middle school for high school exists. Similarly, if there is a high school only in a particular village, no efforts are given or collecting distance of anearest place where a primary or middle school exists. The distance by range of nearest place where educational facility is available have been collected from villages having no facility of any of the above mentioned nine categories of educational institutions.

In the medical fields there are a variety of amenities. These are indicated with abbreviations whether within the village exists any of the following medical institutions :—

Hospital	..	H
Maternity Home	..	MH
Child Welfare Centre	..	CWC
Health Centre	..	HC
Primary Health Centre	..	PHC
Primary Health Sub-centre	..	PHS
Dispensary	..	D
Family Planning Centre	..	FPC
TB Clinic	..	TB
Registered Private Practitioner	..	RP
Community Health Worker	..	CHW
Others	..	O

The information have been collected in respect of those institutions only which are organised and/or aided by Government/Semi-Government/Public bodies/Local bodies/Social Service Agencies like the missionaries. The institutions run by private individuals have not been covered. But the information on Registered Private Practitioners of any branch have been noted. If there are more than one facility in the village, the, same have been indicated in appropriate abbreviation. In case of more institutions of a type in the villages the number of institutions have been indicated against the abbreviations in bracket. Where no amenity is available within the village, a dash (—) has been shown in relevant column and any of the facilities as given above available in a nearest place have been noted showing the distance in broad ranges.

The sources of drinking water available within the village have been indicated by codes as follows :—

Tap	..	T	Fountatin	..	F
Well	..	W	Canal	..	C
Tank	..	TK	Lake	..	L
Tubewell	..	TW	Spring	..	S

Hand Pump	HP	Nallah	..	N
River water	R	Others	..	O

If there are more than one source of drinking water in the village, the same have been indicated in appropriate abbreviations in the relevant column. In absence of any source of drinking water in the village, a dash has been given in the relevant column and next to it the distance in broad ranges of the nearest place where any of the aforesaid facilities is available has been given.

The Post & Telegraph amenities available within the village have been collected by codes as given below.

The Post Office includes Branch and Sub Post Offices also. The villages having no facilities in respect of Post & Telegraph, have been marked by dash (—) in the relevant column and next to it the distance in broad ranges of the nearest place where any of the facilities as given below is available has been noted.

Post Office	..	PO
Telegraph Office	..	TO
Post & Telegraph Office	..	PTO
Telephone connection	..	Phone

The information on hat, market have been collected for each village. The day(s) of the week on which market/hat is held have been taken into account. Where the market/hat is held daily in a village, it has been recorded as "daily". In absence of hat/market in the village, the distance in broad ranges of the nearest place have been shown where it is held.

It has been looked whether the village is served by any mode of public transport like bus, rail and waterways and the abbreviations adopted for this purpose are given below :—

Bus	..	BS
Railway Station	..	RS
Navigable waterways	..	NW
(including river, canal etc.)		

If there is more than one facility in the village, these have been indicated separately by individual codes as given above. If no facility is available within the village, a dash is shown in the column and next to it in brackets, the distance in broad ranges of the nearest place where the facility is available is given.

Approach to the village refers to the state of roads leading to the village from the communication centre. The approach to village have been indicated by following abbreviations :—

Pucca Road	..	PR
Kuccha Road	..	KR
Navigable River	..	NR
Navigable Canal	..	NC
Navigable Waterway (other than river or canal)		NW

If there is more than one approach to a village, the same has been given by appropriate codes in the relevant column.

The name of the nearest town and its distance in kilometers from the village has been collected. The nearest town so indicated may not be located within the state of West Bengal, this may be located in the neighbouring state also. The operational conveniences have only been taken into consideration while collecting this information. Only those towns have been considered, which have been declared urban according to 1981 Census.

The facilities of power supply have been collected from the village where it is available in the following codes :—

Electricity for Domestic consumption	ED
Electricity for Agricultural consumption	E. Ag.
Electricity for other purposes like industrial, commercial etc.	EO
Electricity for all purposes listed above	EA

Where the power is consumed for more than one purpose, this has been indicated accordingly.

The staple food, only in terms of grains, consumed by the majority population of the village during the major portion of the year have been recorded. The grains may be rice, wheat, jawar, maize etc. Sometimes a combination of these grains have been consumed by the villagers as the staple food. In that case, it has been indicated as reported.

The landuse pattern of the village has been presented in five broad categories. These are as follows :—

1. Forest :—This includes all lands classed as forests under any legal enactment dealing with forests. This may be owned by the state or by any private individual. Land maintained as potential forest land have also been treated as forests. Any area used for any other purpose but situated within the forest so defined, is treated as 'forest'.
2. Irrigated land :—It relates to the land which has actually been irrigated under different types of irrigation for the purpose of cultivation. The sourcewise break-up of area in hectares under different systems of irrigation has been given. The codes in respect of sources have been noted as under :—

Government Canal	..	GC
Private Canal	..	PC
Well (without electricity)	..	W
Well (with electricity)	..	WE
Tube well (without electricity)	..	TW
Tubewell (with electricity)	..	TWE
Tank	..	TK

Lake	..	L
River	..	R
Waterfall	..	WF
Others	..	O

3. Unirrigated land :—All areas under rainfall crops or under dry rice cultivation have been classified as unirrigated areas.
4. Culturable Waste :—It is defined as the lands within cultivated holds have not been cultivated during the current year and last five years or more in succession. Such lands may be either fallow or covered with shrubs and jungles. Land under thatching grasses, bamboo/ bushes and other groves for fuels etc., which are not included under orchards or forests and land grazing, meadows have also been included in this category.
5. Area not available for cultivation :—This stands for barren, uncultivable land and land put to non-agricultural use. Barren and unculturable lands cover land within cultivable holdings which cannot be brought under cultivation without incurring a high cost. Land put to non-agricultural use stands for all lands occupied by buildings, roads and railways or under water, e.g. rivers and canals etc.

Any important place of religious, historical and archaeological interest within the village have also been mentioned in the village directory. Information on the number of copies of newspapers coming in the village, and motor cycles / scooters / cars / Jeeps and tractors available in the village have been mentioned accordingly and denoted the following codes :—

Newspapers	..	N
Motor cycles/scooters	..	M
Cars/Jeeps	..	C
Tractors	..	T

In addition to the information that have been collected through Block Development Office, the following four appendices to the Village Directory have also been compiled :

- I. Police Stationwise abstract of educational, medical and other amenities,
- II. Land utilisation data in respect of non-municipal (non-statutory) Census Towns,
- III. Police Stationwise list of villages where no amenities are available.
- IV. Police Stationwise list of villages according to the proportion of scheduled castes/scheduled tribes population by ranges.

The first two appendices have been provided for obtaining actual position regarding various amenities available in the police station and as well in the district and the land utilisation pattern in the non-municipal

census towns which have been treated urban by virtue of the criteria prescribed for urban units. Appendix III has been devised for planning input in areas where basic infrastructure is lacking. Appendix IV has been prepared for the purpose of planning of welfare programmes for scheduled castes and scheduled tribes at micro-level, particularly in relation to the area development oriented programmes.

Scope of Town Directory :

The Town Directory has been prepared for all the statutory towns like, Municipal Corporation (MC), Municipalities (M), Notified Areas (NA), Town Committees (TC) and Cantonment areas as well as the non statutory census towns (NM) including the outgrowths. The particulars about each town have been presented in seven statements each dealing with a particular set of information. The information so collected in the seven statements is independent of each other. The statement IV A is a new addition in town directory statements. It covers the information regarding demographic, civic and other amenities available in the notified or recognised slums having a population of 50,000 or more. The towns having outgrowths have been identified with the asterisk mark (*) and information available on outgrowths for each statement have been included with the information of core town. In some cases we have failed to give information as detailed in the statements. In that case information not available (NA) has been quoted in the respective column.

The population of each town during 1981 Census has been considered for determining the class of towns. All the towns have been divided into six classes according to the range of population. They are as follows :

1.	Population one lakh and above	..	Class I
2.	Population from 50,000 to 99,999	..	" II
3.	Population from 20,000 to 49,999	..	" III
4.	Population from 10,000 to 19,999	..	" IV
5.	Population from 5,000 to 9,999	..	" V
6.	Population less than 5,000	..	" VI

A brief discussion on seven statements is given below :

Statement I

This statement provides some basic data based on the primary census Abstract. It deals with the status and growth history of the town. The column nos. 1 to 5 give information on class, civic status, name of the town and its location code with the police station the town belongs to. The area of the town in square kilometer has also been given. The column nos. 6 to 19 give demographic information of the town. Where the town did not have any urban status for the reference year (s), a 'dash' (—) has been given under these column(s). The decadal growth in percentage has been shown below the population figures from column nos. 8 to 15. The status of the statutory towns has been fixed as on April 1980.

Statement II

The statement deals with the physical aspects and location of the town as on April 1980. This statement is divided into two. First dealing with the climatological data which include rainfall and maximum-minimum temperature. The information on climatological aspects are not available in respect of some of the towns. In that case the information noted from the nearest place where it is available. This alternative however, could not be followed uniformly due to the fact that the data are not available for the nearest place even. In such cases the information not available (NA) has been stated. In the second part i. e. in column nos. 6 to 12 the locational particulars have been stated for the referent town.

Statement III

Data on municipal finances for the year 1978-79 have been presented relating to the civic administration of the statutory bodies. The information in respect of the non-municipal census towns have also been collected wherever available and have been shown in the statement. The information on finances have been collected from the concerned local body. In case of non-municipal census towns, the information has been collected from the panchayat. The non-municipal census town having no information has been marked with information not available (N. A.).

Statement IV

This statement contains 19 columns. The column nos. 1 to 5 provide general information of the town and the column nos. 6 to 19 deal with the amenities having in the referent town. Where the town is not served by the fire fighting services of its own, the name of the nearest place from where the referent town gets services has been given. In absence of any of the public amenities as referred to in col. 6 to 19 the relevant column has been depicted suitably like dash (—) which means amenities not available and information not available (NA) respectively.

Statement IV A

Information about notified or recognised slums have been given in this statement. The information is limited to the slums located in class I and class II towns only. The civic and other amenities that are being available to the slum-dwellers have been given in this statement. In case of more than one slum in a town, it has been spelt-out separately and the information have been submitted separately for each slum.

Statement V

This statement deals with the medical, educational, recreational and cultural facilities existed in the town as on 1979. If there is more than one institution of any type, it has been indicated within bracket in number. In case of medical institutions, the institutions run by the private doctors have not been taken into account. The institutions run by or aided by Government, Semi-Government, Local Bodies, Charitable Institutions, Social Service Agencies like Missionaries etc. have been counted. Where these facilities were not available, the

distance of the nearest place where these facilities are available has been noted. The Family Planning Centres attached to hospitals or Maternity and Child Welfare Centres or Primary Health Centres have been treated as separate units. The Maternity and Child Welfare Centres, Venereal Disease Clinic, Chest Clinic and Leprosy Clinic etc. have been treated as independent institutions and indicated in "Others" category of medical institutions.

While presenting the data on educational institutions, the same procedure as in village directory has been followed in respect of the school and college education. The column 6 includes educational institution like Teachers' Training Collage, Basic Training College etc. The information on short hand, typewriting and other vocational training institutions have been given in column 10. In this case only the recognised institutions have been considered. The "recognised" means recognised by any statutory authority— like the education department, commerce department, labour department etc. of the Government or Semi-Government or autonomous bodies, Public sector projects like municipality, corporation etc.

The vocational institutions like Music/Dancing School, Art College, Painting/Clay-modelling institutions etc. have been covered under column 10. The Institutions which are not included in cols. 6 to 14 have been taken in col. no. 15 under 'Others'. The columns 17—20 deal with the recreational and cultural facilities of the town.

Statement VI

This statement contains particulars of Trade, Commerce and Industry of the town. It also depicts information on Banking institutions like Banks, Agricultural Credit Societies and non-agricultural credit societies.

The details of abbreviations used in different statements of Town Directory are given below :—

Brief History of the district.

The great epic Mahabharata, Raghuvansa and in some of the Puranas refer the Gangetic delta lay between the kingdom of the Suhmas in Western Bengal and that of the vangas in Eastern Bengal at the dawn of the history. The areas covered were not defined properly as it varied from time to time according to the prowess of their kings. Suhmas lived near the seacoast on a great river. The places were marshes and full of canes. This portion has been identified with Bhagirathi. The vangas are described as having fleets of warships and a strong force of elephants. At the time of the Raghuvansa, the country was dominated by vangas. But the naval forces of the vangas were defeated by Raghu, who set up pillars of victory on the isles in the midst of the Ganges. Probably, these islands represented the present area of the district of Twentyfour Parganas. Prior to the end of the fifteenth century, reliable records regarding the location of the district are available. A few details in Ain-i-Akbari reveals that the district formed part of Satgaon revenue division, the jurisdiction of which was Sagar Islands on the south to a little above Plassey on the north and Kabadak river on the east beyond the Hugli on the west. The district gained prominence with the events of Sepoy mutiny of 1824 and 1857. The first one broke out among the sepoys stationed at Barrackpore during the Burmese war in 1824. The out-break of the mutiny in 1857 gained a national importance.

Physical Aspects :

The district Twentyfour Parganas lies between 21°31' and 22°57' north latitude and between 88°2' and 89°6' east longitude. The district extends over 14136.0 sq.kms, of which rural area covers an area of 13509.9 sq. kms, while urban area of the district is 626.1 sq. kms. according to 1981 Census. The district is an irregular parallelogram in shape. The district is bounded on the north by Bangladesh and the district of Nadia, on the east by Bangladesh, on the south by Bay of Bengal and on the west by river Hugli. The river Hugli flowing from north to south and separates the district from Hugli, Haora and Medinipur.

As the district lies within the limits of the Gangetic delta, the physical features are like that of deltaic land. The district has plain surface and is little raised above flood level and the highest ground is that bordering the river channels. The district may be divided into two natural divisions having distinctly different characteristics. The first one, is the northern inland tract of fairly well raised delta land of old formation and the second is the low lying Sundarbans towards the sea board on the south. The northern tract is a land of slow moving rivers, the beds of which are often out of reach due to the forces of the tides. On the other hand, the Snudarbans are a network of tidal channels, rivers, creeks and islands.

Major characteristics of the district :

(1) The total area covered by forests in the district is 4263 sq. kms. which works out to be 30.16 percent of the total area of the district. Of the total forest area, Sundarbans Tiger Reserve covers an area of 2585 sq. kms. The total reserve forests in the district is 4221 sq. kms. while the protected forests and the unclassed state forests and lands are approximately 39 and 3 sq. kms respectively.

(2) The classification of land use area (as in 1976-77) in the district Twentyfour Parganas is given below :—

(i) Net cropped Area	—	702.25	thousand hectares
(ii) Land put to non-agricultural uses	—	305.64	„ „
(iii) Barren and unculturable waste	—	0.07	„ „
(iv) Miscellaneous tree crops and groves	—	11.20	„ „
(v) Culturable waste	—	10.80	„ „
(vi) Other fallow land	—	1.95	„ „
(vii) Current fallow	—	2.01	„ „

(3) According to 1981 Census, of the total main workers of the district 43.72 percent engaged in agricultural pursuits. Although the northern portion of the district is densely populated as the industrial activity is concentrated along the river Hugli extending from Budge Budge to the northern limits of the district, whereas the southern portion of the district presents entirely different picture. This portion remains rural in character. In the year 1976-77 the total land area covered in the production of the food grains was 719.4 thousand hectares. During the same year rice was cultivated in 642.2 thousand hectares, wheat in 22.8 thousand hectares, pulses in 54.2 thousand hectares and oil seeds in 7.8 thousand hectares. The fibres mainly jute was cultivated in 55.2 thousand hectares of land. The total food grains produced in 1976-77 were 787.0 thousand tonnes; of which cereals alone were produced 760.4 thousand tonnes. Of the cereals again rice produced 707.3 thousand tonnes and wheat 52.9 thousand tonnes. The fibres produced during 1976-77 were 526.3 thousand bales (180 kgs. in each thousand dale). Of the fibres 511.0 thousand bales were jute and mesta 15.3 thousand bales. The yields per hectare of land (1976-77) were 1101 kgs. and 2320 kgs. of rice and wheat respectively.

(4) The district derives its power mainly from the West Bengal State Electricity Board. A small area of the district gets power from the Calcutta Electric Supply Corporation. All the towns of the district are having electricity facilities. In regard to the inhabited villages, it is seen that 23.08 percent villages enjoy electricity facilities.

(5) The district Twentyfour Parganas is the biggest of all industrialised districts of the state of West Bengal. The manufacturing industries play a vital role in the economic life of the district of Twentyfour Parganas. The industrial activities are concentrated along the river Hugli from Budge Budge to the northern limits of the district. As per the house census held in the August-October 1980, the factories, worksheds occupied 29910 census houses. Again, workshop-cum-residence including household industry occupied 33605 census houses. The district had 2765 registered working factories in 1977. Among them, manufacture of edible oils e.g., mustard oil, ground-nut oil, til oil etc., weaving of cotton textiles in power looms, spinning and weaving of jute and mesta, manufacture of wooden boxes, barrels etc., manufacture of card board boxes, manufacture of allopathic medicine, manufacture of costing and forgings, manufacture of fabricated metal product and structural metal product are worth mentioning. There were 14099 small scale industrial units in the district till March 1977.

(6) The principal articles imported are coal, raw jute, kerosine, petrol and diesel. The coal are imported by rail and truck from Raniganj and Jharia coal fields for the Jute mills and the factories. Raw jute comes from the different districts of the state for the mills. The kerosine, petrol and diesel imported at Budge Budge and then distribute to other districts. Of the exported goods, finished jute products, cotton and industrial finished goods are important. A considerable amount of trade is carried on in respect of the animals, vegetables, bricks, timber, bamboo etc. These are exported to the different parts of the country.

(7) The district has grown in importance because of the port facilities. There is also a very important airport. The airport is of international status and used as a passenger traffic. There are two other airports in the district, one in Barrackpur which is mainly reserved for cargo traffic. There is a third aerodrome in Kanchrapara. In addition to that, there are several landing strips in the district.

In a great portion of the district, the waterways, such as estuaries, rivers and creeks are the main and often the only means of communication. On account of the growing importance of the suburbs a large number of ferries ply in the district. The internal traffic of goods and men are mostly carried by small powered motor boats in the ferries. The greater part of the inland traffic is carried by country boats which can carry as much as 150 tonnes. The local boats called pansi and dingi are used in the rivers for passenger traffic. Regarding railway route, the Eastern Railway lines generate in the following routes from Sealdah Railway Station, (1) Sealdah-Ranaghat-Krishnagar, (2) Sealdah-Bongaon, (3) Sealdah-Dankuni (Chord), (4) Sealdah-Diamond Harbour, (5) Sealdah-Lakshikantapur via Baruipur Junction, (6) Sealdah-Canning via Sonarpur, (7) Sealdah-Budge Budge, (8) Sealdah-Barasat-Basirhat.

All the Subdivisional headquarters of the district and all the police stations in the northern portion of the district are connected by roads. In the southern part of the district a few police stations are not connected by roads due to the river courses. The state highway viz., Barrackpur Trunk road is passing through the district. Another State Highway popularly known as Diamond Harbour road is passing through the southern portion of the district from Calcutta. The district is served by 2392 kilometers Extra Municipal roads maintained by the public works and Public Works (Roads) Departments. There are 5829.31 kilometers of roads in the district which are exclusively under the Zilla Parishad. Of the Zilla Parishad's maintenance of roads, 5703.28 kilometers are unsurfaced. A considerable portions of roads are maintained by the municipalities in the district. The area is 2620.83 kilometers. Of them, 1572.50 kilometers are metalled and the remaining portions are unmetalled.

Places of religious historical archaeological and tourist interest.

Of the religious places of the district, the names of Dakshineswar Kali temple on the bank fo the river Hugli, the image of Shyam Sundar at Khardah, the image of Radhaballabh at Ballavpur and that of Nanda Dulal at Shahibana—a village about 8 kms. east of Barrackpur town are worth seeing. The temple of Krishna Roy, dated C. 1785 A.D. at Kanchrapara, a group of four temples in Barendragulli at Halishahar dedicated to Nandadulal, two small Shiva temples at Bhatpara built in C 1724 A.D., which are still more or less in their original condition, a big Nava-ratna temple of Kali at Shyamnagar, a large group of twelve temples and three separate temples at Jaynagar are considered an act of great religious merit to visit. Among the tourist spots of the district, the names of Gandhi Ghat at Barrackpur, Fresherganj and Sagar—both islands in the Diamond Harbour Subdivision—the former one is located in the extreme south of the subdivision when the later is situated at the mouth of the river Hugli. Diamond Harbour, situated on the east bank of the river Hugli ; is the most attractive place for the tourists. People from distant places visit DumDum Airport to see the ups and downs of the plane movements.

In Basirhat, there is a building of archaeological interest in the town—the mosque known as the Salik mosque. The mosque is popularly reputed to have been built by one Ala-ud-din in the year 1305 A.D., but an inscription shows that it was erected by one Ulugh Majlis-i-Azam in 1466 A.D.

Analysis of data

It is a census tradition to analyse certain data on social and demographic information collected during census enumeration and from ancillary projects like Town Directory and Village Directory. The District Census Handbook 1951 and 1961 were decorated with such analysis which were most attractive to the scholars. The District Census Handbook 1981 follows the same manner as in 1951 and 1961. A large number of inset tables has been prepared on Town Directory, Village Directory and Primary Census Abstract to make the analysis more scientific and acceptable.

TABLE—1

Table 1 deals with the distribution of villages according to the availability of different amenities. Looking at the district as a whole 83.17 percent of the inhabited villages of the district are served with educational facilities. It is remarkable that all the villages in Sandeshkhali, Gosaba and Kakdwip have educational facilities. 98.13 percent of the inhabited villages of Gaighata Police Station have educational facilities.

S.C.E.R.T., West Bengal

Date... 26... 3... 92...

53/2

The percentage of villages provided with the educational facilities is found lowest in Mathurapur Police Station (47.11 percent).

Regarding medical facilities in the villages of the district 12.45 percent of the inhabited villages are provided with medical facilities of any type or the other. Police stationwise the highest percentage of villages having medical facilities is Namkhana Police Station followed by Sandeshkhali. 75.00 percent of the inhabited villages of Namkhana Police Station have medical facilities within the villages and in Sandeshkhali 46.30 percent of the inhabited villages enjoying the medical facilities within the villages. This percentage is found lowest in Basanti Police Station, *i.e.*, only 1.54 percent. In a Police Station which appears to be having lower percentage of medical facilities within the village, they are provided with such facilities comprises of Health centres, Maternity and child welfare centres etc. in the neighbouring villages.

98.64 percent of the inhabited villages of the district are covered by the drinking water facilities. There are 35 Police Stations in the district where all the villages have drinking water facilities.

There are 25.00 percent of the inhabited villages of the district served with either Postal or Postal and Telegraph both within the limits of the villages. The highest percentage of villages served with Postal and Telegraph facilities is in Sagore followed by Gosaba Police Stations (77.27 & 70.00 percent).

17.25 percent of the inhabited villages of the district have Markets and Hats. Sagore Police Station has the maximum number of villages where the Markets/Hats are held (50.00 percent). The second position goes to Gosaba Police Station with 48.00 percent.

It is seen from the table that 27.51 percent of the inhabited villages of the district have got communication facilities. The highest percentage of such villages is found in Hingalganj and Gosaba Police Stations *i.e.* 100.00 percent in both cases.

37.61 percent of the inhabited villages of the district are approachable by Pucca Road. All the 28 villages of Mahestala police Station are approachable by Pucca Road. The percentages of inhabited villages approachable by Pucca Road from the nearest communication point are found 93.33 percent, 80.37 percent and 72.15 percent of the villages of Khardah, Gaighata & Amdanga Police Stations respectively.

23.08 percent of the inhabited villages of the district have electricity. It may be noted here that 75.00 percent of the inhabited villages of Bijpur Police Station and 64.29 percent of Naihati Police Station have the privilege of having power supply. Less than 2 percent of the inhabited villages of Kulpi and Pathar Pratima Police Stations have been electrified.

TABLE—2

Table 2 presents data in respect of the proportion of rural population served by different amenities. It is seen from the table that 92.97 percent of the rural population of the district have been provided with educational opportunities. Among the Police stations, Dum Dum, Nimta, Salt Lake, Kakdwip, Sandeshkhali and

Gosaba provide education to the 100 percent of their population. In the police stations of Namkhana and Swarupnagar, the proportion of rural population served by the educational facilities to the extent of 96.86 and 99.84 percent respectively.

20.29 percent of the rural population of the district of Twentyfour Parganas have medical facilities. Among the police stations, this percentage is highest in Diamond Harbour by 93.12 percent and lowest in Baruipur by 2.93 percent.

There are 37 police stations in the district where entire rural population are enjoying the facilities of drinking water. At the district level 96.07 percent of the total rural population are served with the drinking water. The lowest proportion of 87.49 percent of rural population in Falta police station have the facilities of the drinking water.

Regarding the Post and Telegraph facilities in the rural area of the district, 52.18 percent of the total rural population are served with post and telegraph facilities. Market/Hat comprises 31.16 percent of the total rural population. Communication facilities lead to 35.22 percent. 45.03 percent of the total rural population of the district have the privilege of having approach by Pucca road. At the district level 28.09 percent of the rural population are equipped with electricity. Police stationwise Sagore tops the list by 90.60 percent in respect of the post and telegraph. Kultali with the proportion of 64.25 percent in respect of Market/Hat, Gosaba and Hingalganj with proportions of 100 percent for communication supersede the proportions of the other police stations.

**Table—3 DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES
ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE
THESE ARE AVAILABLE**

Villages not having the amenity of 1	Number of Villages where the amenity is not available and available at distance of

Communication	1,723	476	514	2,713

TABLE—3

Table 3 provides information of those villages whose do not have one or the other amenities in the villages but they are available at a distance by different ranges. It is seen from the table that 16.80 percent of the total inhabited villages of the district do not have any type of educational institutions in the villages, although educational facilities are available within 5 kilometers for 98.73 percent of them. 87.53 percent of the total inhabited villages of the district are deprived of medical facility. 66.92 percent of such villages have it within a radius of 5 kilometers only. Among the rest 18.31 and 14.77 percent are served by the medical facilities available at the distance beyond 5 kilometers and above 10 kilometers respectively. There are only 1.34 percent of the inhabited villages which have no drinking water facilities but these villages get such facilities of drinking water within 5 kilometers of distance.

2807 inhabited villages which work out to 74.97 percent of the inhabited villages have no postal and telegraph facilities, but 92.55 of them enjoy such facilities within a radius of 5 kilometers only. The facilities like Market/Hat and communication are not available in 81.12 and 72.46 percent of the total inhabited villages respectively. It may be noted here that 89.70 percent of the villages without any Market/Hat get this facility within 5 kilometers from their respective jurisdiction. In case of communication 63.51 percent of the villages without communication facility get it within 5 kilometers only.

Table—4 DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST TOWN AND AVAILABILITY OF DIFFERENT AMENITIES

Distance range from the nearest Town (in km.)	Number of Inhabited Villages in each range	No. (with Percentage) of Villages having amenity of

Unspecified	4
Total	3,744	3,114 (83·17)	466 (12·45)	3,693 (98·64)	936 (25·00)	646 (17·25)	1,030 (27·51)	1,408 (37·61)	864 (93·08)

TABLE—4

Table 4 shows the distribution of villages according to the distance from the nearest town and availability of different amenities. It is observed from the table that a uniform pattern has been followed in respect of the percentage of educational institutions situated at a different range of distances from the town. There are 353 villages located at a distance of 51 kilometers or more from the nearest town. 315 of them which accounts for 89.23 percent have educational institutions. An interesting point is that the highest proportion, *i.e.* 18.70 percent of the inhabited villages located at a distance of 51 kilometers or more have the medical facilities. It has already been narrated in the foregoing analysis that the drinking water facilities are highly satisfactory in the villages of the district. Further to note that 93.02 percent of the inhabited villages beyond 51 kilometers or more from the nearest town have drinking water sources.

The major proportion of villages which have Post & Telegraph facilities, Market/Hat and communication opportunities in the villages fall in the distance range of 51 kilometers plus. The villages approachable by Pucca road and the villages having power supply have been concentrated to a largest extent in the distance range of 5 kilometers or less.

Table—5 DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE

Population range	Number of inhabited Villages in each range	Number (with Percentage) of Villages having the amenity of							
		Education	Medical	Drinking Water	Post and Telegraph	Market/ Hat	Communi- cation	Approchnd by Pucca Road	Pwoer Supply

Total	3,744	3,114 (83·17)	466 (12·45)	3,693 (98·64)	936 (25·00)	646 (17·25)	1,030 (27·51)	1,408 (37·61)	864 (23·08)

TABLE—5

Table 5 gives distribution of villages according to population range and amenities available. The table reveals that the maximum number of inhabited villages have a population in the range of 500-1999. Of the 2123 inhabited villages in the population range upto 500-1999, only 1800 villages constituting 84.79 percent have educational facilities. The villages in the population range of 2000-4999, the educational facilities are available in 98.17 percent villages. The amenities like medical, drinking water, Post and Telegraph, Market/ Hat, communication, approach by Pucca road and Power supply are available to the populous villages in larger scale than those of the villages having less population.

Total	Twenty four Parganas	3,744	8,90,156.98	74.07	9.36

TABLE—7

Table 7 relates the distribution of villages of Twentyfour Parganas district according to land use. Out of a total area of 890156.98 hectares for inhabited villages of the district, the cultivable area is 74.07 percent of

which 9.36 percent is irrigated. The percentage of the total irrigated area is found highest in the police station Sagore (79.53) followed by Behala (65.97). Kakdwip police station has recorded the lowest irrigated area among the police stations of the district (0.04). The percentage of cultivable area to total area is found highest in Baruipur Police Station (97.30) while the lowest has been recorded in the Police Station Dum Dum (70.49).

Table—8 GROWTH, DENSITY AND SEX-RATIO OF URBAN POPULATION

Census Year	DISTRICT					
	Total Population	Urban Population	% Urban Population	Decadal Percentage Variation in Urban Population	Density (Population Per Sq. K.M.)	Sex-ratio (No. of Female per 1,000 Males)
1	2	3	4	5	6	7
1951	4,609,309	1,365,969	29.64	+49.50	935	678
1961	6,280,915	1,997,957	31.81	+64.29	4475	737
1971	8,449,482	2,970,320	48.67	+35.15	6130	793
1981	10,739,439	4,169,482	38.82	+40.37	6661	847

TABLE—8

The growth, density and sex ratio of urban population in the district in relation to the state has been detected in this table. An immense growth of urban population is observed during the decade 1951-61 (64.29%). The outgoing decade (1971-81) has registered a decadal variation in urban population to the tune of 40.37% over the percentage variation at the state level of 31.73.

IN THE DISTRICT IN RELATION TO THE STATE

Total Population	Urban Population	%Urban Population	STATE		Sex-ratio (No. of Female per 1,000 Males)
			Decadal Percentage Variation in Urban Population	Density (Population Per Sq. K.M.)	
8	9	10	11	12	13
26,299,980	6,281,642	23.88	+32.52	5180	660
34,926,279	8,540,842	24.45	+35.97	5009	701
44,312,011	10,967,033	24.75	+28.41	5624	751
54,580,647	14,446,721	26.47	+31.73	5462	819

The urban density in the district of Twentyfour Parganas is found highest, i.e., 6661 in 1981 in comparison to earlier three censuses. The density of urban population in the state level is found lower, i.e., 5462 in regard to the district itself. Regarding sex-ratio, in the urban sector of the district, the district maintains higher sex-ratio steadily against sex-ratio of the urban sector of the state. In the urban tracts males have always outnumbered females as the other parts of the country. The 1981 census recorded a remarkable improvements in this respect when it rises to 847 from 793 in 1971.

TABLE—10

Table 10 deals with the per capita receipt and expenditure in the urban units of the district. Out of 74 urban units of the district, income and expenditure from 45 units have been received. Information from 29 municipalities have been furnished. The two municipalities viz., Jadavpur and Habra were constituted newly in 1978-79. So the information on income and expenditure were not available. The income and expenditure of 16 non-municipal towns of the district have also been taken into account. While calculating the per capita receipt and expenditure for the urban centres together, the population of those 29 urban centres have not been taken into account. The per capita receipt comes to Rs. 23.26 at the district level. The highest per capita receipt of Rs. 85.48 is noticed in Jaynagar Mazilpur municipality. The Budge Budge municipality ranks second by Rs. 62.50. Among the municipality the lowest per capita receipt is found in

Ashoke Nagar Kalyangarh municipality. All the towns taken together, the per capita receipt of Rs. 0.11 of Chandannagar non-municipal town is the lowest. Annual per capita expenditure comes to Rs. 19.35 at district level. The highest per capita expenditure is noticed in Jaynagar Mazilpur municipality. Budge municipality holds second rank in respect of per capita expenditure (52.65). The lowest per capita expenditure comes to Rs. 0.11 in Chandannagar non-municipal town.

TABLE—11

Table 11 gives information on schools per ten thousand population in the urban sectors of the district. There are in all 4169432 inhabitants in the urban areas of the district and they have been provided with the higher Secondary institution to the extent of 0.39 per ten thousand population. The highest number of such educational institution per ten thousand population comes to 2.02 in Kerulia town and the lowest is 0.15 in Panihati and Bhatpara towns.

As regards the institution like Secondary, Junior Secondary, Primary, there are 0.89, 1.15 and 4.16 institutions in every ten thousand urban population of the district. The highest number of institutions per ten thousand population works out to 4.20 and 6.29 in Panpur town at the Secondary and Junior Secondary levels respectively. The highest number of Primary institutions per ten thousand population is noticed in Baduria town (11.07). It may be pointed out here that the lowest number of institutions per ten thousand population is in Sonarpur town (0.94).

TABLE—13

Table 13 gives information on slums population in class I class II towns. Slums have been identified in 6 towns. The area of the slums in respect of the Garulia town is not available. The information of slums is not available from 13 towns while 6 towns have no slums at all. The proportion of the slum population to

total population works out to 9.23 and the density in slums for 5 towns together is 8517. While calculating the density at the district level the population of Garulia town has not been taken into account as the area of the slum is not available.

TABLE—14

Table 14 deals with the most important commodities manufactured, imported and exported in and from the town. Jute is the major industrial product of the district, although the manufacturing of other commodities in bulk is not absent. The entire jute products of the district are exported. Among the imported articles food grains and coal top the list.

Grand Total		159.8 (Sq. kms.)	741,56	12,522	P—61 M—17 H—7 PUC—3	CHW—10 RP—15 PHC—1 HC—3 D—6				

Note ;— *These Islands are Unsurveyed and 74, 75, 76 and 77 are not the J.L. Nos. These are only the serial Nos. of Units after the J.L. No. 73.

† The population etc. shown against Susni Island relate to Jamboo Dwip which is also Unsurveyed and Unnamed Island, but the locally called Jamboo Dwip. As there is no J.L. No. of Jamboo Dwip the figures have been shown against the last serial No. of the Unit in the Police Station. In fact the Susni Island is not traceable now and it remained Uninhabited till 1971 Census.
